

Van der Moolen case study

Van der Moolen is an international trading firm active in equities, bonds and related instruments such as warrants and futures. Active as a 'specialist' and/or proprietary traders on the important equity exchanges in the United States and Europe.

In Europe, Van der Moolen has a strong presence in the Dutch, German, Swiss, UK, French, Italian and Scandinavian financial markets.

Van der Moolen—A Summary

The Challenge.

- Optimise available space
- Provide traders with 4 or 6 way monitor configurations
- Meet budget and timescale demands

The Solution.

- ErgoMounts VisionPro 300 series multiple LCD monitor supports in conjunction with Dell LCD monitors

The Challenge.

Van der Moolen is a state of the art financial institution that has experienced rapid growth. There was immediate need to facilitate an I.T upgrade allowing traders to work with the latest technology and to increase the number of positions available.

Traders on these markets require between 4 and 6 live screens to be positioned in such a way to provide simultaneous viewing of all screens.

With limited floor space available and the requirement to allow for future proof expansion, selecting the right mounting solution was critical.

The Solution.

ErgoMounts is a specialist manufacturer of mounting solutions for LCD monitors and have supplied the many of the top finance houses within the UK. Working closely with Phil Winder of Van der Moolen, ErgoMounts was able to provide a combination of 4 and 6 way mounts from their VisionPro 300 series. The VisionPro 300 series allows for future proof expansion as additional monitors can be added as required.

In all, the rollout was completed on schedule and on budget and all traders have responded positively to their new environment.
