MD Series with Paralink LCD Mount

The MD arm is the latest high quality LCD monitor arm to include the unique paralink adjuster designed to enhance lateral stability for larger LCD monitors.

The MD arm provides a full 635mm (25") of vertical height adjustment, enough to create a sit-stand wall mounted workstation. When extended the keyboard can be positioned up to 1090mm (43") from the wall and folded to within 216mm (8.5") when not in use. The thinner frame and slimmer design make the MD arm ideal for applications where space is tight and maximum flexibility is required.
