The EMM11 Scrollseal washable optical mouse uses patented SpillSeal technology and has been tested to the international standards of IP66 and NEMA 4X. It's the first washable mouse to incorporate a unique removable roller / scroll wheel that can be easily removed for cleaning. The EMM11 has smooth optical tracking and an ergonomic design featuring three buttons. Two standard buttons with a third button conveniently located in the centre. The innovative design of the EMM11 means that it can be easily washed / immersed and sterilized with most detergents and anti bacterial agents. Every recess can be sterilised including the scroll wheel which can be removed and simply clipped back into place when clean. Supplied as standard with a USB interface along with a USB to PS/2 adaptor. Light Grey or black finish.
