EMSK-97-TP SEALED KEYBOARD WITH INTEGRATED TOUCH PAD DEVICE

Designed for the infection control challenges of today's healthcare environment, the innovative EMSK-97-TP medical keyboard is ideal for use in an array of clinical settings. With the convenience of an integrated GlidePoint™ touchpad pointing device, the new light beige EMSK-97-TP is easily disinfected using any hospital cleaning agent. It boasts a rugged, ABS polycarbonate case, a compact, space saving design, low-profile keys, and optional backlighting. Unlike the FL-series keyboards, the new EMSK-97-TP's have a longer keystroke, this provides for a more tactile feel. They are completely compatible with germicidal sprays and wipes, making them ideal for use in operating theatres, wards, patient rooms, on carts and at nursing stations.
